                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      nucleic -
Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      line parameters:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       protein search, using frame_plus_n2p model

(Sequence 98, Application US/10007693

Patent No. US20020146776A1

GENERAL INFORMATION:
APPLICANT: Bhatia, Ajay
INFORMATION: COMPOUNDS AND METHODS FOR TREATMENT
TITLE OF INVENTION: AND DIAGNOSIS OF CHLAMYDIAL INFECTION
FILE REFERENCE: 210121.515C2
CURRENT FLING DATE: 2001-12-05

SEQ ID NO 98
LENGTH: 1531
TYPE: PRT
CORONISM: Chlamydia trachomatis serovar D
US-10-007-693-98

Alignment Scores:
Percent Similarity: 44.798
Best Local Similarity: 30.218
